Detailed Action

1. Claims 1-7, 9-17, 19-22, 24, 25, 27-39, and 41-50 are presented for examination.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or disclose the claimed method and memory device that limits the number of writes to the memory device to N which is fewer than a maximum allowable number of qualified writes. While some prior art memory devices do have limits on the number of times data can be written which is either based upon the type of memory (e.g. CDs that can only be "burned" once) or based upon manufacturer testing (e.g. flash memory, through testing by the manufacturer it is determined that the device can only be written between 100,000 to 1,000,000 before errors start appearing - taught by Kikuchi), these limits would be the "qualified writes". The claimed invention is directed to a device that limits the number of writes to less than these qualified writes. Examples given in the specification are a device that can be written to only 5 or 10 times (see P 9 Lines 1-4 of the specification)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
